

PRODUCT DETAILS - SIGNATURE -

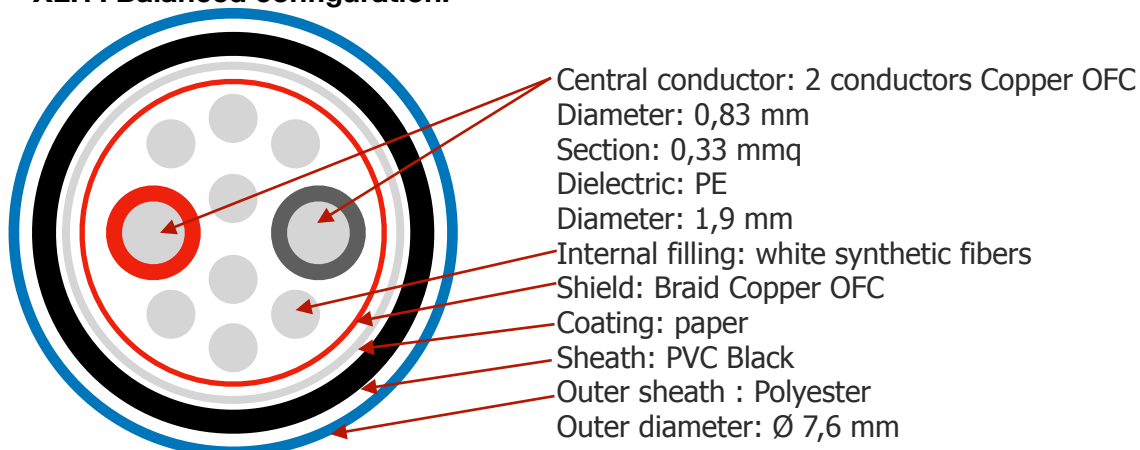

BRAND NAME : LAB Audio Technology®

MODEL NAME: SIGNATURE

SHORT DESCRIPTION: Audio Cable for Instruments with 2 pole + shield,

Connectors available: Plug 2P 6,35 mm semi-balanced configuration.

XLR : Balanced configuration.

Conductor Resistance: 0.061 Ohm/M a 20° C

Capacity:

from Conductor to Braid: 133,5 pF/M 1 KHz

from Conductor to Conductor: 64.37 pF/M 1 KHz

Inductance:

from Conductor to Conductor: 0.681 uH/M 1 KHz

from Conductor to Braid: 0.341 uH/M a 1 KHz

Values may vary under conditions other than test ones.

Technical notes :

The cable is assembled in a semi-balanced configuration and therefore assumes a directionality. The side to be connected to the instrument is indicated on the outer sheath. In cases where the Neutrik® SilentPlug series connector is installed, this must always be connected from the instrument side.

Caution: These cables should not be used to connect passive speakers and output power amp.

Description:

From the Hi Fi experience and the numerous awards that LAB Audio Technology® has received for the quality of its productions, the line dedicated to audio professionals and musicians has born with a series of cables designed to meet the needs of stage and study.

Noise protection, construction quality, sturdiness and audio quality: all at the highest level between world production.

The SIGNATURE cable has qualities of exceptional strength and flexibility with a protective sheath that makes it pleasant to the touch and extremely smooth, so as to facilitate the movements of the musicians during live events.

The quality of the conductors, the particular configuration and the construction geometry of the cable give the Signature cables superior sound quality than the other cables on the market and the use of Neutrik® SilentPLUG connectors (option) allows an intense use and the possibility of disconnect the cable from the instrument without annoying noises in complete safety.

The SIGNATURE cable has been designed with maximum quality for stage use during live events.
